E. Ongoing and Upcoming Activities and Milestones

F. Activities, Developments and Milestones Since Previous Newsletter

G. Previous Activities, Developments and Milestones

H. Political and Corporate Names to Whom You May Wish to Voice Your Opposition and Their Contact Information

Many Thanks.....

Many thanks go to everyone who has supported C4CA for making our first 2 months so successful. We have built a strong foundation on which to continue our fight against the proposed power plant for as long as it may take. Many, many hours and a lot of commitment were required to plan and execute the wide range of activities which have taken place to date.

Our numbers are bigger, our commitment is even greater, and our resolve grows stronger by the day.

C4CA's Immediate Objectives and Activities

C4CA **(Citizens For Clean Air)** is a broad coalition of concerned citizens from throughout Oakville and Mississauga (also referred to as the Southwest GTA) that is committed to raising public awareness of the many issues arising from the 900MW fossil fuel power plant proposed for Oakville by the Ontario Government and TransCanada Energy.

C4CA's Immediate Objectives:

C4CA is pursuing many goals and activities, but key immediate objectives include:

- **Raising public awareness of the many issues** arising from the proposed 900MW power plant and trying to put ourselves on a more sensible path. **We do have time** to stop this power plant if we act! It is not too late. TransCanada Energy still must obtain many approvals before construction can begin but if we don't act this power plant will become a reality despite its serious environmental, health and socio-economic threats.

- Convincing the Ontario Ministry of the Environment that a **full Individual Environmental Assessment of the proposed power plant is required**. The current Environmental Review process that TransCanada is controlling allows it to assess itself, does not require evaluation of alternatives, and is entirely inadequate for a proposed gas plant with extraordinary features like this one. There is no need to build a power plant with so many serious issues in the already over polluted Oakville\Clarkson Airshed. There is plenty of time to develop suitable siting criteria and to assess logical alternatives, but this will not happen under the current process.

- Assisting the Town of Oakville in exercising its various municipal powers in relation to the power plant so as to ensure that the power plant proposal is fully assessed from a municipal planning perspective.

- Continuing to explore other avenues for ensuring that this aggressive and unusual power plant proposal is fully, properly and objectively assessed so as to bring to light its many troubling qualities and its comparative deficiencies before it's too late.

C4CA Newsletter #2 - December 2009

C4CA Activities:

C4CA:

- Has succeeded in creating significant momentum for our defence against this flawed power plant. C4CA, the Town of Oakville, City of Mississauga, and various Oakville and Mississauga ratepayer associations are waging co-ordinated opposition to the proposed plant.

- Has to-date organized over 140 Street Captains, distributed thousands of lawn signs and informational brochures and hundreds of posters to businesses. It has also organized events described elsewhere in this newsletter. Street Captains have been taking responsibility for information distribution and fundraising on their streets. These activities are in support of C4CA's plans to let the Ontario Government and TransCanada Energy know that **putting a power plant in the proposed location just does not make sense!!**

Lawn signs and Posters:

Graphics Alerting You to the Facts:

The December Facts Ad Campaign can be seen using the following link:

C4CA December Facts Ad Campaign

- Has established and maintains an interim web-site, **C4CA.ORG**, to help provide you with information about the proposed power plant, C4CA's activities in opposition to it and how you can support C4CA. The web site continues to be enhanced and upgraded and we expect further improvements in the coming weeks.

- Has engaged:
  - law firm Bennett Jones as lead environmental counsel under the leadership of senior partner Len Griffiths. Following their review of the proposed power plant, Bennett Jones wrote to J. Gerretson, Ontario's Minister of the Environment, and requested a Full Individual Environmental Assessment of the proposed plant. The full text of Bennett Jones' letter can be read using the following link:

    Bennett Jones Letter to Ontario Minister of the Environment Nov. 24, 2009.
  - Government relations firm Prospectus Associates;
  - media relations firm Mansfield Communications and;
  - independent public accountants Parker Simone LLP to provide independent auditing of C4CA's financial policies and procedures. Information regarding our financial accountability is available using the following link:

    C4CA Financial Accountability

- Has assisted in the Town of Oakville's defence of its interim control by-law against the challenge by TransCanada Energy and Ford of Canada. C4CA is encouraged, and believes that all residents should be encouraged, by the **recent decision of the Ontario Municipal Board to uphold the Interim Control By-Law enacted on March 30, 2009.** Members of the community and C4CA made compelling presentations to the OMB Commissioner at the hearing forced by TransCanada Energy and Ford. Presentations were made by: Ms. Susan Hyatt, Mr Dean Hurbert, Mr. Bernard Kruyne, and Ms. Dorothy Tomiuk. Their presentations were cited in the OMB's decision. This Interim Control By-Law "prohibits power generating facilities with an energy production capacity greater than 10MW pending the review and development of more detailed criteria".

  The full text of the ruling by the OMB can be read using the following link:

  OMB Rules in Favour of Town of Oakville Interim Power Plant By-Law

- Encourages you to read editions of this newsletter to stay informed and to assist you in informing others including family, friends and neighbours.

- Also encourages you to visit our web-site at **C4CA.ORG** for additional and latest information. Previous Newsletters can also be found at our site. C4CA Newsletter #1 – November 2009 is of particular interest because it provides answers to power plant Frequently Asked Questions, explanations and details such as:
  - Where would the proposed power plant be built?
  - Key information about the proposed plant, its toxic emissions, the already over-polluted location it is being dropped into, its vapour plumes, noise generated, vibration generated, its financial

arrangements, and surrounding factors such as its proximity to the QEW and one of the busiest (if not the busiest) railway corridors in Canada;

- Missing information, unanswered questions and the flawed process used to select the location;
- What should be done?

- Firmly believes that it is crucial for everyone affected by this power plant, referred to as the Oakville Generating Station by TransCanada Energy and the Ontario Government, to be personally committed and actively involved in opposing it. We the residents of Oakville and Mississauga must stand together and make our voices heard if we are to succeed in reversing the decision to build this power plant in the proposed location.

Return to Table of Contents

How You Can Help

- Join C4CA;
- Learn all you can about the issues. Use the internet and other sources of public information to discover how extraordinarily unusual this power plant proposal is and how concerned you should be about its air emissions, noise, vibration, fogging, icing, financial burden, security and other consequences.
- Talk to your friends and neighbours to build awareness;
- **Donate to C4CA to help hire the expertise we require to win this battle;**
- Volunteer your time and/or expertise to assist on our various committees. There can never be too much help. C4CA has enlisted expertise in many areas including Legal, Health, the Environment, Engineering, Fundraising, Public Relations, Youth and Administration, but we will still gladly welcome expertise and assistance in all related fields. We are determined to correct the mistaken location decision for the proposed power plant.
- Participate **today** in our campaign of letter writing and phoning the Ontario Government Premier and Ministers, the Ontario Power Authority and TransCanada Energy.

  Assistance on participation in this way is available using the following link:

  Contact Addresses and E-Mail Addresses

- Become a Street Captain. Use this e-mail address to sign up.

  StreetCaptains@c4ca.org

  Street Captains are responsible for canvassing and fundraising on each street, communicating with the residents, distributing signs, etc.;
- Assist in raising awareness and holding events. People can help plan events to raise awareness of our opposition as well as the threats posed by the proposed plant;
- Contribute your time and support specific activities which come along from time to time.

Assistance is required now for:

- Business Liaison Lead
- Graphic Designer
- Administration

More information is available from the C4CA website

C4CA.ORG

Some Reasons Why The Proposed Power Plant Just Does Not Make Sense!

The over-arching goal is to prevent the construction of the proposed power plant in the Oakville/Clarkson air-shed. The power plant proposed by the Ontario Government and TransCanada Energy **just does not make sense!**

C4CA has highlighted numerous problems and serious concerns with this power plant proposal. Here are some of the key ones:

1. **Location:** The location of this plant, with its extremely unusual proximity to numerous schools and homes is illogical and reflects callous indifference to the legitimate concerns of the community.
2. **Air-Shed:** The Oakville-Clarkson airshed is already toxic and we cannot allow a massive new polluter to compound this problem.
3. **Individual Environmental Assessment:** An Individual Environmental Assessment, which should in C4CA's view expose the proposed plant's deficiencies, is not being followed.
4. **Flawed Process:** A flawed process was followed to select this location (and for all proposals considered in Oakville/Clarkson). The process defied common sense. The strict limitations from the beginning, and the narrow focus on expediency and the availability of infrastructure at this site, means that critical human issues such as the proximity of many, many schools and homes have been ignored or dismissed and far better alternatives were left unexplored.
5. **Children's Health:** Children's health will suffer disproportionately from this facility if it moves forward.
6. **Demand For Power Below Forecast:** The need and timing for new and highly polluting fossil fuel facilities is questionable given the province's power capacity/consumption trend lines.

7. **Financial:** The plant is not free by any stretch of the imagination. It poses real financial risks to Ontario taxpayers who are on the hook for the lucrative profit guarantees given to TransCanada Energy.

As just one example of the public outcry against this proposed power plant from within the Ontario Government's ranks, Oakville's MPP Kevin Flynn has said that locating this power plant in the proposed location "defies logic".

A power plant in this location is of benefit to Ford of Canada because it will be selling unused land to TransCanada Energy for the plant site.

The power plant is of benefit to TransCanada Energy because it will receive a guaranteed rate of return on its investment, regardless of how much the plant operates.

But, while they benefit, the community and children for decades to come may suffer irreversible harm.

Pictures of other relevant gas-fired power plants in the area including:

- the 839-MW Goreway power plant in an industrial area of Brampton;
- the 683-MW Halton Hills power plant in a rural area of Halton

as well as pictures

- pointing out the location of the proposed Oakville power plant from Maple Grove Village Mall at Cornwall and Maple Grove Drives

are available on-line using the following link :

Return to Table of Contents

C4CA Organization

C4CA is organized with a Board of Directors and Committees:

- Board of Directors:
  - Douglas MacKenzie — Chair & President;
  - Frank Clegg — Director & Chair of Fundraising Committee;
  - Brenda Potter Phelan — Director & Chair of Finance Committee;
  - Lawrence Zimmering — Director & Chair of Environment Committee;
  - Susan Hyatt — Director & Chair of Health Committee;
  - John McLeod — Director and Co-Chair of Communications and Public Relations Committee

The Board of Directors works closely with principal advisors and Committees.

C4CA's organizational structure can also be seen using the following link:

C4CA Organizational Structure

C4CA's operations are governed by a defined set of operating policies, procedures and controls and its finances are audited by external independent auditors. More information is available using the following link:

C4CA Financial Accountability

Return to Table of Contents

Ongoing and Upcoming Activities and Milestones

Jan.-Feb. **C4CA Fundraising Events:**

C4CA is planning:

- information sessions in Oakville and Mississauga;
- a fundraising RAPP (Run Against the Power Plant);
- a fundraising gala ball and/or auction;

Watch the C4CA website **C4CA.ORG** for details as the time approaches.

Jan.-Feb. **TransCanada Energy Environmental Review Report (ERR)**

TransCanada is expected to issue its Environmental Review Report (ERR) early in the new year. The public will have 75 days to comment. .

Ongoing **Information Distribution and Fundraising**

C4CA is continually distributing key information about the power plant and the status of the proposal to build it. Fundraising is necessary to support these activities.

C4CA has lawn signs and buttons available for residents to show their opposition to the power plant. In return C4CA hopes to receive donations.

C4CA also has a poster campaign in progress to install posters in Oakville businesses.

Details are available from the C4CA website **C4CA.ORG**,

Ongoing **Town of Oakville and other Key Supporter Co-ordination**

Close communication and co-operation is being maintained with the Town of Oakville, and other key supporters including The City of Mississauga, The Region of Halton, The Region of Peel, and rate payer associations in Oakville and Mississauga.

Ongoing and Upcoming Activities and Milestones

Ongoing **Freedom of Information Filings**

Various organizations involved in this power plant proposal have failed to disclose key related information about the proposed power plant and the process that led to its selection. As a result, requests have been made under the Freedom of Information and Protection of Privacy Act to compel disclosure so that the public can fairly scrutinize what has happened behind closed doors. Fifteen FOIA requests have been made so far.

respectively

Dec. 22, 2009 **TransCanada Energy Appeal OMB Decision on Town of Oakville's Interim Control By-Law Restricting Construction of Power Plants**

On Dec. 4, the Ontario Municipal Board issued a decision to uphold the Town of Oakville's Interim Control By-Law Restricting Construction of Power Plants.

TransCanada Energy have been given leave to appeal this decision by the Ontario Superior Court of Justice.

Activities, Developments and Milestones Since Previous Newsletter - (Nov.2009)

The full letter can be read using the following link:

TransCanada Energy Given Leave to Appeal OMB Decision Upholding Town By-Law

Dec. 16, 2009

C4CA Petitions J. Gerretsen, Ontario Minister of the Environment Requesting an Individual Environmental Assessment for the Power Plant

In a letter to J. Gerretsen, Ontario's Minister of the Environment, C4CA President Doug MacKenzie detailed the inadequacies of the environmental review process being controlled by TransCanada Energy for the proposed power plant and highlighted the many troubling issues and concerns that this proposal obviously raises. He petitioned Mr. Gerretson for a full Independent Environmental Assessment of the proposed power plant.

The full letter can be read using the following link:

C4CA Petitions Minister of Environment for full Independent Environmental Assessment

Dec. 15, 2009

Town of Oakville Requests New Provincial Regulation for Airborne Fine Particulate Matter

The Town of Oakville has "filed an application with the Ontario government under the Environmental Bill of Rights asking the government to institute a new regulation under the Environmental Protection Act (EPA) - or a new air pollution act if need be - that effectively regulates the emissions of airborne fine particulate matter (fine PM) to protect communities from adverse health effects."

The proposed plant is expected to be a large emitter of hazardous Particulate Matter.

Details of the request can be read using the following link:

Town of Oakville Request for New Provincial Particulate Matter Regulations

Dec. 11, 2009

C4CA Launches Print and Video Campaign and Press Releases

C4CA launched new a new video on YouTube in opposition to the proposed power plant. The video has interviews with medical professionals and politicians from various levels of government, all expressing their concerns that such a power plant, with all of its hazards, could be proposed for the designated location.

The video can be viewed on YouTube on the internet using the following link:

C4CA - Power Plant Hazards on YouTube - Dec.2009.

A parallel campaign with new graphics to realistically depict the proposed plant was also kicked-off and Press Releases were issued with opinions and information regarding the proposed power plant.

Activities, Developments and Milestones Since Previous Newsletter - (Nov.2009)

Details can be seen and read using the following links:

Dec. 10, 2009

C4CA Initiates Letter Writing Campaign to Provincial Elected and Corporate Officials

C4CA initiated a letter writing campaign in which it requested **all** citizens to write to provincial elected and TransCanada Energy officials to express their dissatisfaction with the proposed power plant.

Template letters are available at the C4CA web-site **C4CA.ORG** and can be easily completed for either e-mailing or printing and mailing.

Names and contact information of key officials are also provided.

Dec. 9, 2009

C4CA Hosts Oakville Power Plant Information Night

C4CA hosted an Information Session at John Knox Christian School. Well over 400 concerned citizens attended to hear the C4CA Executive discuss C4CA's strategy and to ask questions.

Meeting attendees expressed their disbelief and great concerns at the possibility of the power plant, and their increasing determination to stop it.

Dec. 9, 2009

TransCanada Awards Generator Turbines Contract to Mitsubishi Heavy Industries

Continuing to act as if the proposed power plant is a foregone conclusion, TransCanada Energy awarded a generator turbines contract to Mitsubishi Heavy Industries of Japan. However, in situations such as these it is typically necessary to have an order placed in the manufacturing queue long before actual manufacturing. Ordering must also be made well in advance because of delivery restrictions. The orders should therefore **not** be seen as reflecting the certainty of this power plant proposal, because it remains subject to many permitting and approval requirements.

Details are available from the Oakville Beaver website using the following link:

Oakville Beaver - TransCanada - Turbine Contract

Dec. 8, 2009

Environmental Law Firm Bennett Jones Writes Follow-up Letter to The Government of Ontario

C4CA's environmental law firm, Bennett Jones, issued a follow-up letter to their letter of Nov. 24 to J. Gerretson - Ontario Minister of the Environment, D. McGuinty - Premier of Ontario, and other elected officials at all levels of government and officials at power plant proponents The Ontario

Activities, Developments and Milestones Since Previous Newsletter - (Nov.2009)

Power Authority, TransCanada Energy and Ford Motor Company of Canada Limited.

The letter highlights the decision, issued on Dec. 4, by the Ontario Municipal Board to uphold the Town of Oakville's Interim Control By-Law Restricting Construction of Power Plants, and the fact that the power plant proponents had not engaged in their promised public consultation.

The letter re-iterates details of the flaws with the proposed plant and its location, the harm that could be brought to local residents and the need for an Individual Environmental Assessment.

The full letter can be read using the following link:

Bennett Jones Follow-Up Letter Ontario Minister of the Environment Dec. 8, 2009

Dec. 4, 2009

Ontario Municipal Board Announces Decision in Favour of the Town of Oakville's Interim Control By-Law Restricting Construction of Power Plants

In March 2009 The Town of Oakville passed an Interim Control By-Law which "prohibits power generating facilities with an energy production capacity greater than 10MW, pending the review and development of more detailed criteria" from being built in Oakville. That was the result of the Town of Oakville not having been given enough time to assess the proposed power plant. Challenges by TransCanada Energy and Ford of Canada to set aside the interim control by-law were made in front of the Ontario Municipal Board and failed.

Details of the Decision can be read using the following link:

OMB Rules in Favour of Town of Oakville Interim Power Plant By-Law

Nov. 27, 2009

C4CA Publishes Open Letter Detailing the Inadequacies of Ontario's Environmental Control Processes and Standards in the Oakville Beaver

C4CA published an open letter in the Oakville Beaver highlighting the lack of common sense used in selecting the proposed power plant site. The letter also described the inadequacies in Ontario's system or regime of environmental controls.

The full letter can be read using the following link:

C4CA Open Letter Re: Inadequacies of Ontario Environmental Processes and Standards

Nov. 24, 2009

TransCanada Energy Hosts Closed Information Meeting

As part of its "community outreach" programme, TransCanada Energy held a closed information session at Otello's Banquet Hall in Oakville regarding the proposed power plant. 39 representatives from 23 various ratepayer associations were given 65 minutes in total to raise questions regarding the presentations, unavailable before the meeting, made by TransCanada

Activities, Developments and Milestones Since Previous Newsletter - (Nov.2009)

Energy. The many concerns and issues raised by attendees at the meeting were neither publicly released by TransCanada Energy in conjunction with the release of its own meeting materials nor, in the view of C4CA, adequately answered.

Coverage of the Meeting is available from the Oakville Beaver web-site using the following link:

C4CA Rally at TCE Information Session

Nov. 24, 2009

C4CA Mounts Rally at TransCanada Energy Closed Information Meeting

C4CA organized, in a very short period of time, a significant rally at the TransCanada Energy closed information meeting at Otello's Banquet Hall in Oakville. More than 300 boisterous protesters outside the closed information meeting made TransCanada well aware of the groundswell of opposition to the power plant that it and the Ontario Government is proposing. The rally had speakers, including MPP Kevin Flynn and community residents from Mississauga and Oakville.

Details of the rally are available from the Oakville Beaver web-site using the following link:

C4CA Rally at TCE Information Session

Nov. 24, 2009

Environmental Law Firm Bennett Jones Writes Letter to The Government of Ontario

C4CA's environmental law firm, Bennett Jones, issued a letter to J. Gerretson - Ontario Minister of the Environment, D. McGuinty - Premier of Ontario, and other elected officials at all levels of government and officials at power plant proponents The Ontario Power Authority, TransCanada Energy and Ford Motor Company of Canada Limited.

The letter details the flaws with the proposed plant and its location, and the harm that could be brought to local residents.

The full letter can be read using the following link:

Town of Oakville Requests Stronger Environmental Assessment of Power Plant

Nov. 13, 2009 **C4CA Endorses Liberal MPP's Proposed Law Separating Power Plants and Homes**

C4CA commended Liberal MPP Kevin Flynn for his call for a moratorium on the construction of gas-fired power plants in Ontario and his proposal for new laws prescribing minimum separation between future gas-fired power plants and residential neighbourhoods.

Details are available using the following link:

C4CA Commends Liberal MPP Kevin Flynn

Nov. 13, 2009 **C4CA Files Freedom of Information Requests with Ontario Power Generation Inc.**

C4CA filed requests for information necessary to analyze the requirements for the power plant proposed for Oakville

Details are available using the following link:

C4CA Files Freedom of Information Requests

Return to Table of Contents

Previous Activities, Developments and Milestones

Nov. 4, 2009 **Students' Rally**

Close to 300 environmentally conscious students marched from Oakville Trafalgar High School to the Chisholm Education Centre, in pouring rain, to demonstrate their opposition to the proposed power plant. There were speakers and activities to raise funds and awareness to support opposition to the proposed power plant.

A video of the Student's Rally can be seen using the following link:

C4CA Student Rally

Oct. 13-20, 2009 **OMB Hearing & Special Session**

This OMB hearing was held to hear the complaints of TransCanada Energy and Ford of Canada

Previous Activities, Developments and Milestones

that the Interim Control By-Law enacted by the Town of Oakville in March 2009 to prevent construction of power plants greater than 10MW in size infringed on their rights. The complaints were subsequently rejected and the By-Law upheld.

Opposition to the proposed power plant was so apparent and large, the Chairman of the OMB hearing requested an unscheduled evening meeting to allow residents an adequate opportunity to voice their opinions (100% against).

Oct. 20, 2009 **Town of Oakville Special Council Session**

Noting the large and universal opposition to the proposed power plant, the Town of Oakville held a special Council Meeting about the proposed power plant. Council Chambers The session set the stage for subsequent actions by the Town.
