

# Ride 4 Clean Air

**WANTED:**  
Concerned citizens to cycle for cancellation of **Power Plants** crazy close to children, homes and schools - create noise and cause change!

**CURB THIS PLAN - CALL THE PREMIER**

[www.c4ca.org](http://www.c4ca.org)

Ride 4 Clean Air - 11am June 3rd

Have you even seen a gas fired generating plant? Join us for a short ride from north Oakville to the Halton Hills power plant to see one that is brand new, and about 2/3 the size of the one proposed for Oakville. You'll be amazed!!!

**Date:** Thursday June 3, 2010

**Rain Date:** Wednesday June 9, 2010

**Time:** 11:00 departure

(registration opens at 10:30)

**Location:** Munn's Church, 5 Dundas St E  
(corner of Dundas and 6th Line in Oakville)

We'll leave the church at 11 and ride north on 6th line to the plant. A catered lunch awaits us at the park across the road from the plant. While we eat, a C4CA expert will explain to us a little about the plant. Then, we ride back down to the church, arriving back at approximately 2pm.

The distance from the church to the power plant is 14km so our round trip is 28km but we've also mapped out a route of approximately 40 km for cyclists trying to get extra mileage. Cyclists can choose their route on June 3rd.

**Register Now** - limit of 60 cyclists for catered lunch

By email to [Carolyn@tectona.com](mailto:Carolyn@tectona.com)

**Registration fee \$30 (includes lunch)**

## 28km or 40km Ride

### Awareness Event to **STOP Power Plants** Near Homes & Schools in Ontario

- A 975 Megawatt gas-fired power plant is being proposed for a strip of land between Cornwall Rd and Royal Windsor Dr, next to GO and CN rail tracks
- The power plant would be one of the largest gas plants in Ontario
- The plant would be only 60m from the nearest office, 320m from the nearest school and 400m from the nearest home, with 6 schools and approx. 11,000 homes within 3km

Come cycle through the beautiful countryside north of Oakville and see for yourself what a 683 Megawatt plant looks like.
