

Why step backwards?

Premier McGuinty has made his position clear in support for the Oakville gas-fired power plant, a position which I deplore and I believe it is a grave mistake! I say so with the full conviction of my intellect, and from the bottom of my heart and soul! And, unlike many of those in the gas industry who support the TransCanada project, I do not have a conflict of interest in this matter. I am only motivated by human conscience, common sense, and health and safety concerns. I find the Premier's position very disappointing, after all the great steps he has taken towards reducing greenhouse emissions in Ontario and fighting the air pollution which threatens our health. Why do we have to take a step backwards?
